

A preventive exam helps find health conditions before they become serious. It helps you to know if you are at risk for disease. It considers your family history and conditions you already have. It even looks at your lifestyle behaviors.

A preventive exam may include screenings. Screenings tell your numbers for blood pressure, cholesterol, blood glucose and more. Knowing these can help you and your doctor make changes to improve your health and reduce your risk.

## MOST PREVENTIVE CARE IS COVERED 100 PERCENT

You are covered for preventive care. Most is covered 100 percent if you see an in-network provider. There may be fees for certain services or procedures during your preventive care visit. Remind your doctor that you are there for your routine preventive exam so your visit is properly billed.

## PREVENTIVE CARE OR DIAGNOSTIC CARE — WHAT'S THE DIFFERENCE?

Preventive care is when you go to a doctor for a checkup only. This means that you do not have symptoms of illness or a medical history that requires treatment or screening. Your preventive care should be covered at 100 percent. It should not be subject to your plan's deductible or coinsurance.

Diagnostic care is when you go to a doctor for symptoms of a medical condition. You may have exams or screenings to diagnose, monitor or treat your condition. These services are not covered 100 percent. They are subject to your plan's deductible and coinsurance.
